EDUCATION

B.Tech – in Computer Science & Engineering

November 2022 - May 2026

CGPA: 6.11/10.00 (Final semester SGPA: 8.50/10)

Rashtrasant Tukadoji Maharaj Nagpur University,

HSC, Class XII

June 2020 - April 2022

Shivkrupa Jr. College Gadchiroli, Gadchiroli, Maharashtra.

SSC, Class X

March 2019 - March 2020

Shivaji High School And Jr. Science College, Gadchiroli, Maharashtra.

SKILLS AND INTERESTS

Interests

Software Engineering, Backend Development, Full-Stack Web Development, Python Development, SQL, REST API Development, Database Systems, Artificial Intelligence, Data Structures & Algorithms, Software Design, Web Technologies,

Programming

Python, C++, Core Java, Django, JDBC, SQL, OOP, Data Structures & Algorithms (DSA), NLTK, NumPy, Pandas, HTML, CSS, JavaScript, REST APIs, Git, GitHub, MySQL, Database Management, CRUD Operations, Exception Handling, File Handling, Functional Programming, Debugging, API Integration, Data Analysis, Web Development

PROJECTS

RO Product Selling and Service Website — Full-Stack Web Development Project

Analysis

January 2026 - April 2026

Major Project as a part of curriculum ([Website link](#))

- Developed a full-stack e-commerce and service-booking web application for RO water purifiers using React (Vite) for frontend and Node.js/Express.js for backend, enabling end-to-end product sales and service management.
- Designed and integrated RESTful APIs to manage product catalog, booking workflows, and user data, supporting 100+ simulated booking requests for installation, servicing, and repair.
- Engineered a component-based architecture with optimized frontend tooling, achieving sub-2-second load times across desktop and mobile devices

College Assistance Chatbot — AI/ML Full-Stack Project

Analysis

November 2025 - January 2026

Major Project as a part of curriculum ([Github link](#))

- Developed a full-stack AI-powered chatbot using Python and Flask, delivering instant 24/7 automated responses to 200+ student inquiries on admissions, academics, and campus services.
- Engineered a RESTful backend API to receive user queries, process them through a Natural Language Processing (NLP) model, and return structured JSON responses in real time.
- Implemented an NLP preprocessing pipeline using NLTK, including tokenization, lemmatization, and intent classification, to accurately interpret diverse user queries and improve response relevance.

INTERNSHIP/TRAININGS

Python Full Stack Development Intern, ([View link](#))

Kiran Academy, Pune

Feb 12, 2026 – Present

- Working as a Python Full Stack Development Intern, gaining hands-on experience in front-end and back-end development.
- Add specific tools/technologies used (e.g. Django, Flask, React, MySQL) and tasks completed.
